

Wedding Arch Instructions

- It is easiest to assemble the wedding arch with 2 people, as it is fairly large.
- Move both pieces of the arch to the set-up site before starting assembly.

NOTE: The Arch will not fit through most doors and stairwells fully assembled and may cause damage or personal injury if attempted.

- Line up the two halves of the arch as shown above. Put a Bolt through the holes on both sides at **A**. Put a washer and nut on the two bolts and tighten only snug.
- Unscrew the white nylon wing nut at **B** and push the base support down and out to form a triangle as shown in the photo above.
- Refasten the base support with the white nylon wing nut (only snug) using the top hole in the support. Do the same with the 3 other supports.
- **For outdoor use, the wedding arch must be fastened to the ground with stakes and cable-ties or weighted with 60 pound sand bags at the 4 base supports. Failure to do so may result in personal injury or property damage.**
- Reverse set-up procedure to make wedding arch ready for pick-up by Camelot
